

ACS Enterprise Content Management System

In recent years, many government agencies have found out the hard way that having a lot of data is not the same thing as having the answers you need. Any agencies ability to achieve its goals depends on its ability to collect, manage and deliver the right information to the right person at the right time. That is the central goal of Enterprise Content Management (ECM).

This information comes in many forms, documents, printed reports, forms/overlays, databases, electronic messages, videos, etc. Content management is the effective and efficient management of the information which is essential to the business of local government.

ACS' Content Management system provides...

- Full integration into ACS' Financial, Payroll, Utility Billing and Tax Systems*
- Greatly reduced file & retrieval time of reports*
- Automatic capture of reports*
- Automatic indexing, bursting and filing*
- Provides for paperless means of report storage*
- Provides for documents to be shared with other systems and multiple offices*
- Gives end-users a powerful tool to manage the storage and retrieval of all documents*
